# LINEAR INFRASTRUCTURE CAPABILITY STATEMENT

*With you all the way.*

## COMPANY OVERVIEW

WMS Engineering is a specialist engineering consultancy firm providing high quality solutions to hydraulic design, water resources, stormwater and floodplain risk management problems. We are flexible, reliable and passionate about what we do. Our mission is to be the consultant of choice for the engineering solutions we offer and to continue building our portfolio of successful projects and satisfied clients

### INFRASTRUCTURE AND CONSTRUCTION SUPPORT SERVICES

WMS Engineering provides high quality services across the eastern seaboard, with offices in Brisbane, Sydney and Melbourne. Our team has the skills and tools to help with your next project. We offer:

- Due diligence site investigations
- Ad-hoc construction support, including temporary works
- Sediment basin sizing and design
- Erosion control
- Culvert sizing
- Temporary crossings
- 1D, 2D and 3D hydraulic modelling
- Flood impact assessments
- Cross drainage design
- Longitudinal drainage design
- Flood emergency response plans
- Scour assessments (e.g. for bridge design)
- Constraints and feasibility assessments

### WHAT SETS US APART

WMS Engineering is a specialist engineering consultancy firm providing high quality solutions to hydraulic design, water resources, stormwater and floodplain risk management problems. We are flexible, reliable and passionate about what we do. Our mission is to be the consultant of choice for the engineering solutions we offer and to continue building our portfolio of successful projects and satisfied clients.

We have more in-house hardware and software than larger consultancies, allowing us to deliver outcomes rapidly and efficiently run numerous simulations to optimise designs.

At WMS, we provide fit for purpose solutions with minimal fuss. We pride ourselves on being:

- **Responsive:** we can receive and resolve requests rapidly;
- **Informed:** we understand requirements across Qld, NSW and VIC, and appreciate the broader project context, priorities and drivers;
- **Capable and qualified:** we provide high quality services you can trust;
- **Safety first:** we prioritise safety in design to minimise risk;
- **Committed:** You can rely on us to stay the course until the project is complete.
