- Expert technical review

### EMPOWERING MINING EXCELLENCE

Leveraging our extensive background in serving mining clients, we understand the importance of operating within a constantly evolving landscape and are experienced in tailoring solutions for your specific site. We ensure thorough adherence to mining regulations, providing confidence that our projects align with industry standards and legal requirements. Safety, risk mitigation and environmental stewardship are key focus areas that we maintain in all deliverables. Our flexibility as a firm enables us to take a long-term approach and positions us to provide ongoing project support through the life of the mine.

### OUR BRAND

WMS Engineering is a specialist engineering consultancy firm that offers top-tier solutions for a range of water resources, stormwater, and floodplain risk management challenges. Our core values include flexibility, reliability, and a profound passion for our work. Our mission is to become the consultant of choice for the engineering solutions we provide and to continuously deliver value for our many satisfied clients.

We possess a significant array of in-house hardware and software and are capable of conducting numerous simultaneous simulations to deliver speedy results. We have the flexibility to utilise your preferred software choice or provide recommendations on the most appropriate approach for your project.
